

Mini Makers: Crafting Dreams, One Creation at a Time

Welcome to Mini Makers, where kids aged 5 and up embark on a journey to explore their imaginations and build essential mental and emotional skills. Our program focuses on deepening their understanding of their environment and enhancing their perception of what they've already learned.

In Mini Makers, children engage in activities that stimulate creativity and critical thinking, helping them connect their experiences and ideas in new and meaningful ways. With guidance from our supportive instructors, kids learn to navigate their thoughts and emotions while discovering the joy of self-expression and problem-solving.

Join us at Mini Makers, where every session fosters growth, imagination, and a deeper connection to the world around them. 60 - 90 min.
